TZe laminated labels - design to last

Brother TZe laminated tapes consist of six layers of materials, resulting in a thin yet extreme strong label. The direct thermal transfer ink is sandwiched between two protective layers of PET (polyester film) which protects the text against the effects of liquids, abrasion, temperature, chemicals and sunlight. As the labels are tested to the extreme, professional quality labels have been designed to last.

Abrasion Resistant Chemical Resistant Easy Peel Fade Resistant Laminated Temperature Resistant Water Resistant Strong Adhesion
